

## DEMANDS CHANGE IN PHILIPPINE BILL

Senator Lippitt Tells Democrats of Conditions He Will Exact.

## AMERICANS MUST HAVE THE BALLOT

Prohibition To Be Omitted—Bar Sought Against Japanese and Chinese.

(From The Tribune Bureau.)  
Washington, July 20.—The conditions on which the Philippines bill will be permitted to pass at this session of Congress have been laid down by the administration leaders of both houses. Senator Lippitt, of Rhode Island, leader of the opposition to the bill in the upper House, and one of the Senate conferees who will shape up the difference between the two houses.

Some of the more important of these are:

Rejection of the House amendment which would virtually disfranchise all the Americans in the islands.

Adoption of the Senate amendment providing for a vice-governor, to be appointed by the President, who shall have control, among other things, of the Department of Non-Christian Affairs, so as to prevent their coming under the control of the Christian Filipinos.

Two American Officials.

Adoption of the Senate amendment providing for an American auditor and chief for an American director of civil service.

Provision that any change in the immigration laws must be approved, before going into effect, by the President of the United States.

Rejection of House provision which would permit the enlarged electorate to vote at the next election for both houses of the Legislature.

Adoption of the Senate amendment allowing the Governor thirty days after adjournment of the Legislature in which to veto bills.

Inclusion of the provision dividing the islands into legislative districts, in order to prevent gerrymandering, particularly that which might deprive non-Christian tribes of their representation.

One important amendment, adopted by the Senate, but left out in the exchange of bills in the House, will also probably be left out in conference—providing for prohibition in the islands.

It is, however, not included in the conditions imposed by Senator Lippitt as the price of withdrawing his opposition to the bill.

May Oppose Even Then.

"It does not mean to say," said Senator Lippitt today after outlining the amendments he would insist on, "that I will approve the bill after these amendments are adopted, but at least I will not lay awake nights if the bill is passed after they have been included. Since the position of the House is so strong, I will not oppose the bill, but I will oppose the amendments."

He said that the date of the next Legislature will be to be chosen. The House bill specifies June 5. It will have to be set for some time in September.

The amendment for a vice-governor, to be appointed by the President of the United States, is most important, especially as he will have supervision over the non-Christian tribes.

## EUROPE TO ATTACK U. S. EXPORT TRADE

Business Men Warn Congress of Battle to Come.

Washington, July 20.—A general European attack upon America's unprecedented gold reserve and foreign trade at the close of the war is predicted in a statement submitted to the House Judiciary Committee today by the National Foreign Trade Council urging the passage of the Webb bill to permit American combinations in export trade.

Pointing out that the present enormous export business is due largely to an abnormal demand, the council says the liberty to cooperate with rivals and customers of American firms have enjoyed has produced highly organized selling agencies and that the United States cannot hold its position in the world of business if European industrial and governmental cooperation versus American-compelled competition is to continue.

The statement is signed by a committee of exporters, including John D. Ryan, president of the American Mining Company, and James A. Farrell, president of the United States Steel Corporation.

The Judiciary Committee concluded hearings today on the Webb bill. H. C. Lewis, of New York, spoke for it. He said he had proof that economic prices were higher than export prices in both Germany and England.

## KEEP CHILDREN HERE, SAYS BANKS

Fresh Air Workers Hear Detention Plans Told at Health Meeting.

Dr. Charles E. Banks, senior surgeon of the United States Public Health Service, put a damper last night on efforts of members of the Fresh Air Federation of New York to get their small charges out of the city during the infantile paralysis epidemic. Dr. Banks and other speakers declared that every endeavor should be made to keep children in New York and prevent the spread of the disease. While not yet ready to advocate a detention camp for the children of going out of town, Dr. Banks said that such a scheme had been worked well in Florida during an outbreak of yellow fever.

Ignoring the purpose of the meeting, which was to obtain the cooperation of the speakers in spreading the belief that local health authorities would see to it that no infected child left New York, Dr. Banks said that the health certificate issued by the Board of Health of New York amounts to a guarantee that the child will be kept in New York.

"There are 180 cases in the state outside of New York City," he said, "and New York City is responsible for its spread. There is a question just now about the health certificate issued by the Board of Health of New York amounts to a guarantee that the child will be kept in New York."
